# SRM CENTER FOR CLINICAL TRIALS AND RESEARCH

## ABOUT US

The SRM Center for Clinical Trials and Research (CCTR) is a clinical trial facility with a focus on performing cutting-edge studies and clinical trials with the intention of enhancing healthcare.
The leading worldwide pharmaceutical companies and the premier clinical research organizations rely on SRM CCTR as a dependable partner for their clinical trials. Our facilities, quality, selection, knowledge, and skills support clinical research.The CCTR offers everything from feasibility studies to archiving, with dedicated facilities and people to support clinical trials and research. The CCTR makes sure that clinical trials are carried out in accordance with legal criteria that guarantee and protect the subjects' safety, wellbeing, and rights in accordance with high ethical standards.

## VISION of CCTR

To become a world class advanced clinical trial and research center offering best clinical research facilities for accelerating the delivery of novel and innovative therapies ensuring quality, ethical practices in compliance with International Conference on Harmonization (ICH) - Good Clinical Practice (GCP) guidelines.

## MISSION of CCTR

- To perform clinical trials efficiently and professionally in clinical research following international guidelines for clinical research as per ICH-GCP.
- To strengthen cooperation and collaboration between Industry, Academia, and Government agencies.
- To train and empower the next generation of Clinical Investigators and Clinical Trial Professionals.

## SERVICES

### Clinical trials:

Interactions between clinical research professionals and pharmaceutical corporations are critical because they influence research quality as well as participant recruitment and retention over the length of a clinical study. Research personnel have particular expectations about conducting trials, which pharma companies must communicate and manage. We provide services for

- Phases I, II, III, IV and post marketing surveillance studies
- Medical Device and Diagnostic Validation
- BABE Studies

### Academic trials and research:

From the laboratory bench to the hospital bedside, and from cultural development to concepts in sustainability, our research staff are converting discovery into real, measurable influence that is transforming the world for the better. Collaborations Across

#### *Disciplines*

The world's concerns and the big picture of what's possible rarely fit neatly into a single academic area. This is why, at SRM CCTR , we have made collaboration and communication a way of life. We cultivate a network of famous researchers across disciplines, geographies, and industries in order to transform promising ideas and breakthroughs into outcomes that genuinely matter.

#### *The Top Faculty*

Top scholars and talented researchers understand that teaching and learning are inextricably intertwined. . They understand that by connecting with students, they may push the bounds of discovery. Students, in turn, engage and challenge them.

## Courses Offered:

- *Certificate Course in Good Clinical Practice (GCP) Funded by DHR- ICMR*
- *Internship Course in Clinical Research*

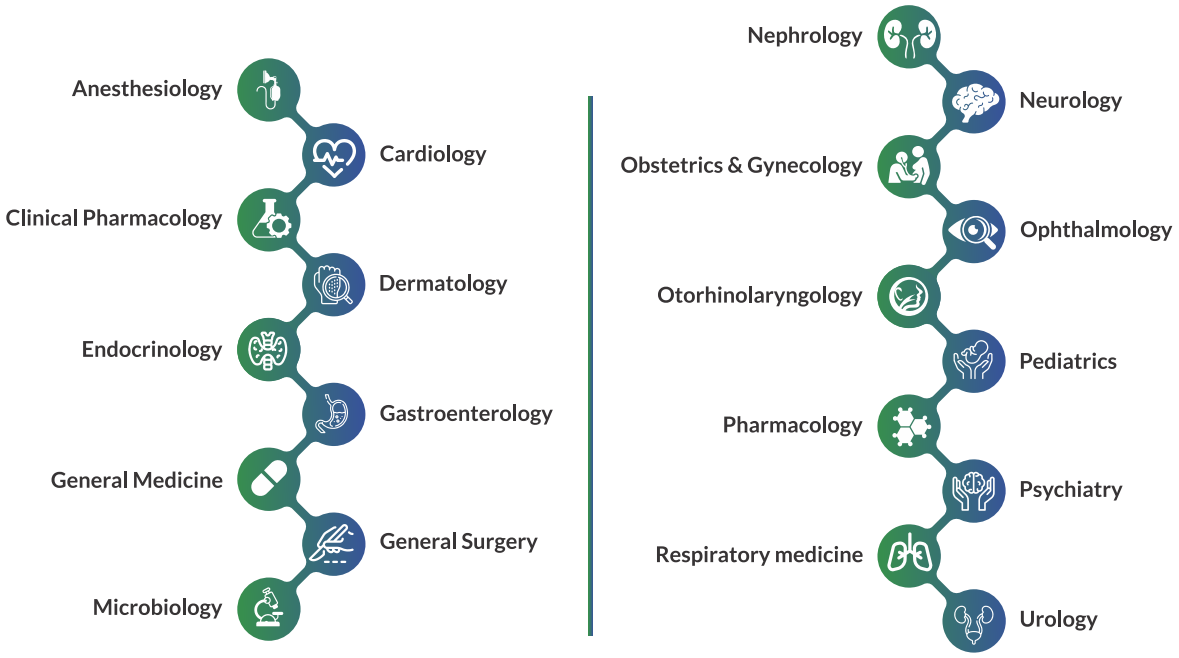

We Probe, We Prove pervades all we do. We care about the investigators with whom we collaborate, our sponsor colleagues, and, most importantly, the patients. These patients rely on a well-planned and well-executed study not just for personal health benefits, but also to provide novel and effective treatments to other patients in need.

- State-of-the-art Infrastructure
- At SRMIST, the CCTR is a stand-alone facility for carrying out all stages of clinical trials.
- Biochemistry, Molecular biology and protein biology labs
- NABH Approved Facility at SRM Hospital
- Dedicated trial staffs – 24*7 hrs
  A committed team of therapeutically aligned individuals who have a passion about the science and the treatment of patients, with academic, regulatory, and industry experiences as well as direct clinical experience (some of whom are still providing patient care), who are easy to work with and eager to team up to bring your drugs to market as quickly as possible.
- ICU & MICU Facilities at SRM hospital
- Central Lab- SRM Hospital
- NABL accredited Virology lab
- Sample storage room with deep freezers (-80 °C & -20 °C )
- Data Storage- highly secured access
- Power Back up -24*7 hrs
- GCP trained clinical research professionals
  Extensive experience and knowledge in a wide range of indications, medication types, and trial designs, as well as a thorough understanding of global standards of care and the competitive landscape.
- Pharmacy with 24 hrs power backup and access control
- High Speed network facilities
- Conference Room For Study Training And On-Site Visits
- Monitoring Space With Computer Access And Printing Capabilities

## CLIENTS/SERVICE PARTNERS:

- Sanofi
- GSK
- Bharat Biotech International Limited
- Serum Institute of India
- Hetero Biopharmaceuticals
- Glenmark
- Gennova
- Zydus Cadila
- Alvoge
- Deva Holding
- Shantha Biotech
- PHRI-Canada
- George Clinicals
- IQVIA
- ICON
- Diagnosearch
- LabCorp
- Cliantha Research
- Wockhardt
- Veeda clinical research
- Jehangir Clinical Development Cente
- Cliwis
- Abiogenesis

## AVAILABILITY OF EXPERT CLINICAL INVESTIGATORS FROM DIFFERENT DISCIPLINES

## Contact us

: SRM Center for Clinical Trials and Research
3rd Floor, E Block Extension, SRM Hospital,
SRM Medical College Hospital and Research Centre,
Kattankulathur, Tamil Nadu - 603203. INDIA.
